

# ACTION PLAN: INSTRUCTIONS & CRITERIA FOR SUCCESS

## YOUR CHANGE PROJECT SHOULD:

- address an issue you're passionate about; one that's characterized by injustice, an imbalance of power, bias, etc.
- identify the causes & effects of the problem
- set a goal to create a better future
- engage an audience by sharing information
- identify how you will know if the change has occurred

## CRITERIA FOR SUCCESS:

Presentation of information is clear and well thought-out. The audience knows from the start what the problem is, why change is needed, and how change can be accomplished.

Project is well-organized--the information presented is very easy to follow and matches the purpose & plan for change.

Project materials provide strong support of the main or key ideas.

Project includes many examples (and different types of examples). The examples and evidence are well chosen and support the main ideas well.

Project concludes with a strong summary of the key ideas and a clear focus on change and creating a healing future that addresses (and tries to solve) the problem.
